CRYOCOVERS

INSULATED CRYOGENIC TRANSFER HOSE COVERS

An Alternative to Conventional Cryogenic Transfer Hose Insulation

- Low Density Cryogenic Foam Insulation
- Sleeve Type Protective Covering Fits All Cryogenic Transfer Hoses
- Lightweight and Durable
- Protects Hands and Equipment From Cryogenic Transfer Conditions
- Maintains Flexibility in Liquid Nitrogen
- Reduced Static Loss Rate Compared to Un-Insulated Liquid Nitrogen Transfer
- 100% Waterproof Outer Material
- Non-Brittle, Safe and Efficient Insulation
- Designed for All Standard Hoses
- Minimizes Water and Condensation
- Prevents "Puddling" on Floors

A Unique Combination of Materials with Properties Allowing for Safe and Efficient Liquid Nitrogen Transfer Applications.

Standard Lengths are 2, 4, and 6 Feet. Custom Lengths Available.
